Instructions

Mini water cycle

Equipment

- large bowl
- small glass
- cling film
- large elastic band
- small weight

Method

1. Fill the large bowl with several centimetres of water.
2. Place the small glass in the centre of the bowl, making sure no water gets inside it.
3. Cover the bowl with cling film, fastening it securely to the side of the bowl with an elastic band.
4. Put a small weight on top, in the centre of the cling film.
5. Place on a warm, sunny window sill and leave for a few days.
6. Make regular observations and record what happens to the water over time.
