Ethical Spending Impact

Choose two of the pairs of pictures you have looked at and discussed with your partners and write a paragraph about each comparison here. Try to include lots of detail about how each option affects the environment or people involved in its production.

Think about:

- why there may be a price difference in the products featured in each picture.
- any negative impact that is caused to people or the environment used to produce the items.
- how the negative impact is avoided in the picture that represents a more ethical spending choice.

Write the title of each type of product you are comparing (e.g. fair trade, single-use plastic, throwing away, farming methods).

Product type: _____

Product type: _____
