Conclusion

You have been gathering results to answer your question about the conditions in which mould grows.

What question did you investigate?

Draw and describe the two slices of bread.

What do you notice about your results and your observations? Is there more mould on one of the slices? Did the mould grow faster on one slice?

Can you use your observations and results to answer your question?

Conditions for Mould Growth

Make a list in the space below of the different conditions that cause mould to grow.

Conclusion

You have been gathering results to answer your question about the conditions in which mould grows.

What question did you investigate?

Draw and describe the two slices of bread.

What do you notice about your results and your observations?

Can you use your observations and results to answer your question?

Why do you think the mould grew better in this condition?

Conditions for Mould Growth

Make a list in the space below of the different conditions that cause mould to grow.

What do you notice about your results and your observations?
