Use Scales

Six children are playing a game. They position cones evenly along a number line to 200. In turns, they stand at 0 and throw a hoop to land on one of the cones.

0 200

George: My hoop landed halfway along the number line.

Usma: I threw my hoop one space further than George.

Lauren: My hoop landed on a multiple of 10.

Joshua: My hoop landed one increment before the end.

Freddy: My hoop did not reach halfway.

Jackson: I threw my hoop further than Freddy.

Draw a number line to show the number each child's hoop landed on.
