Computing – Learning Together Activities

Barefoot Computing has been set up, to create amazing home learning activities. They are all fun and creative and have been built by teachers to help guide children and parents through some fundamental computing skills, without needing screen time. They include everything you need to get started, with activity sheets and accompanying materials. I have recommended some of the activities for you to try, however feel free to work through the ones that will both, enjoy and challenge you, whilst working through them.

https://www.barefootcomputing.org/homelearning

Recommended activities – Building Blocks, Dance Routine, Pizza Party, Going Wild

Week 1 – Complete the activity and learning resources, then choose an interactive learning game to put your skills to the test.

Week 2 – Complete a different activity and learning resource, then choose an interactive learning game to put your skills to the test.

There is also some Mini Missions, if you want to have a go at a few on a smaller scale. As well as, Interactive learning games to support those skills that you have been practicing.
