Teacher reference sheet

| Image | Name and location | Type of settlement | Features to look for |
|---|---|---|---|
|  | Somerset, England | No evidence of prehistoric settlement | There is no evidence of a settlement, but children may notice ridges in the fields, elevated positions and woods that could have been used for building materials. |
|  | Hambledon Hill, Dorset, England | Iron Age hill fort | Earthwork ridges are visible, which would have been used for defence. |
|  | Peak District, England | No evidence of prehistoric settlement | Although there is no settlement, children may point out the river as a water source and woods that could have been used for building materials. |
|  | Grimspound, Devon, England | Bronze Age settlement | A perimeter wall and the remains of roundhouses can still be seen at the site. |
|  | Yeavering Bell, Northumberland, England | Iron Age hill fort | There are visible remains of circular stone buildings. |
|  | Crug Hywel, Black Mountains, Wales | Iron Age hill fort | There are earthwork mounds around the perimeter and remains of circular stone buildings. The fort was also built on elevated land. |

| Image | Name and location | Type of settlement | Features to look for |
|---|---|---|---|
|  | Oughtershaw, Yorkshire Dales, England | No evidence of prehistoric settlement | Although there is no evidence of a settlement, children may point out the river as a water source, mounds in the fields and elevated positions. |
|  | Dinas Dinlle, Gwynedd, Wales | Iron Age hill fort | The elevated position and earthwork banks provide evidence of the hill fort. |
|  | Barbury Hill, Wiltshire, England | Iron Age hill fort | There are various features including a double ring of earthwork banks, a path running through the middle and an elevated position. |
|  | Cadbury Hill, Somerset, England | Iron Age hill fort | The large, flat hill in the background has a level summit and an elevated position. |
|  | Buttertubs, Yorkshire Dales, England | No evidence of prehistoric settlement | Despite there being no evidence of a settlement, children may notice the natural, limestone potholes, possible remains of buildings and nearby steps leading down from the road. |
|  | Somerset farmland, England | No evidence of prehistoric settlement | Even though there is no evidence of a settlement, children may notice ridges and mounds in the fields, nearby woods and the circular area in the middle of the image, crisscrossed by three disused runways. |
