Comparing and Grouping Everyday Materials

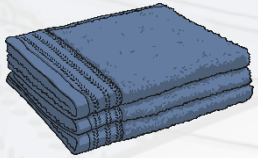

What Does Material Mean?

Everything around us is made from a material.

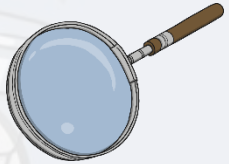

Objects might be made from...

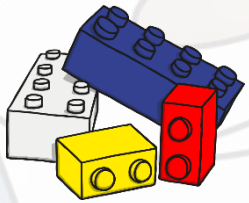

wood

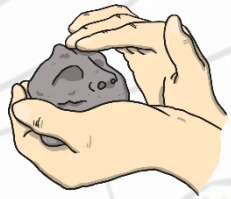

fabric

glass

plastic

clay

Look around you. Find three objects and see if you know which material they are made from.

Activity Time

Let's have a go at describing different objects!

We can use the **Word Cards** to help us describe the materials.

Then, you can use **Describing Materials** activity to show what you know.

twinkl.com

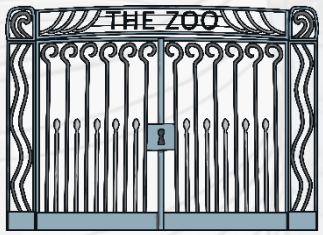

Grouping Materials

Have a look at these objects...

How would you group them together?

Why would you group them that way?

Talk to the person next to you about which objects you would group together and why.

Activity Time

Looking around your classroom, can you group some objects together?

With a partner, or in a small group, group the objects together.

Can you talk about what you have done?

Then use the **Grouping Materials Differentiated** Activity to show what you know.

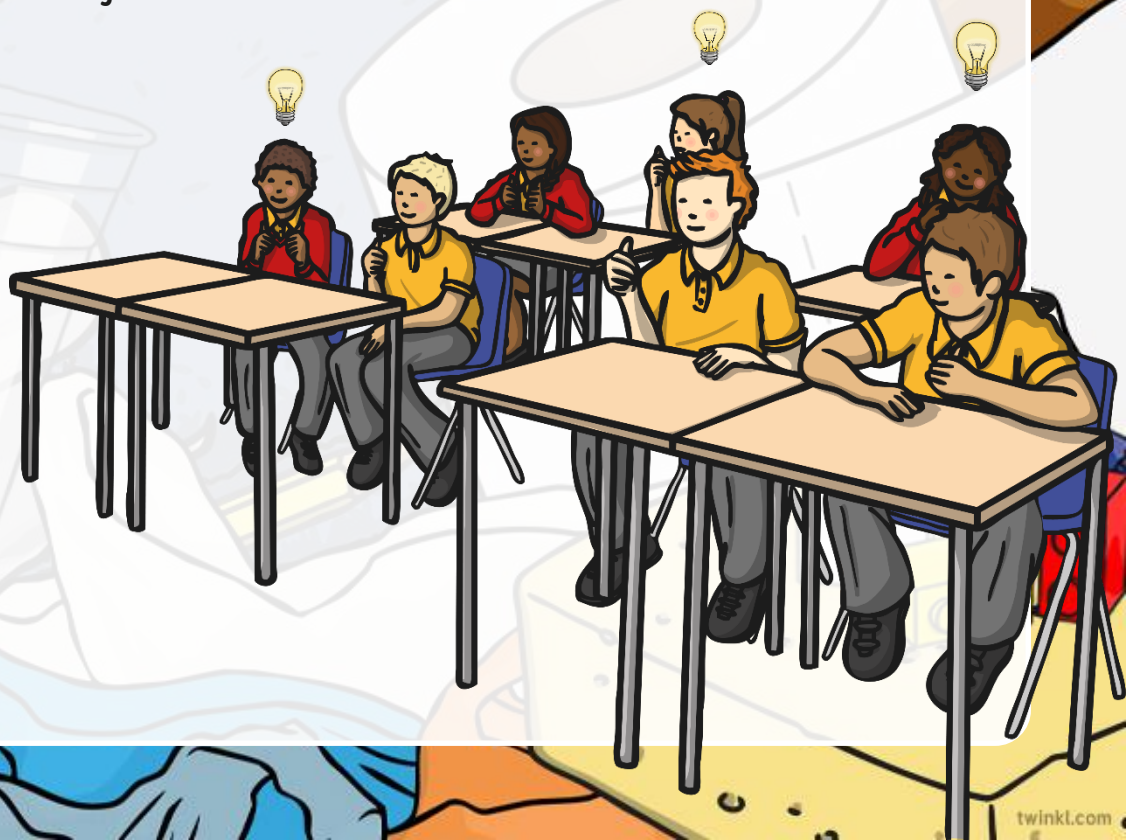

What Have You Learnt?

Can you point to an object in the classroom and describe it?

Why is that object made from that material?

Can you find another object made from the same material?
