Space Topic Tasks

Monday	Tuesday	Wednesday	Thursday	Friday
Our Solar System- Encourage your child to think about what they already know about space and create a mind map. Can they name the planets in our solar system? Use the Solar System Song to create a diagram showing the order of the planets. Or make real ones using balloons and paper mache.	**Astronaut Aerobics-** Astronauts have to be fit and agile for their missions into space. Ask your child to design a home workout and put your agility to the test!. Then, your child can plan a day of healthy eating for the aspiring astronauts thinking carefully about each food group.	**What are Day and Night?-** Share the video of day and night with your child. Watch the video and then create a poster about day and night explaining why we have day and night. Play the quiz and see how many answers you can get right!	I**s There Anything out There?-** Tim Peake is a famous British astronaut. Ask your child to record the questions they would ask him if they could interview him. Can they answer the questions in role as him? Why not task them with designing a new space suit for him? What would make a good space suit?	• Make an Alien Space Ship. First paint or cover a paper plate with silver foil. Then create an alien figure. You could use pompoms, pipe cleaners and wiggly eyes. Stick the alien in the centre of the paper plate and place a clear cup over the top, securing with plenty of glue. Finish by personalising with a variety of collage materials.
