Please post all home learning on SeeSaw as Miss Benham would love to see what you have done :)

Phonics	Literacy	Maths	Topic	Art
Mrs Allaway and I have been so impressed with your phonics already this term! Go through the alien and real word PPT as a warm up, read each word carefully and remember to look for the special friends! Top tip! If it is an alien word remember not to try and make it a real word, say the sounds you see! Then using the sheet and coloured pen or pencil look find the special friends and read the words to an adult. **<u>Extention Task</u>** – Please log on to phonics play(see website for login details) https://www.phonicsplay.co.uk/	A planet theme today! Read through the text about planets and The Solar System. Choose the text that is appropriate for your child's ability, this is a suggestion *yellow to blue reading band **green to purple reading band *** gold and above	This week we have been looking at column addition with and without regrouping. It would be really good to have another practise of this today even though we have done it before. Top tips! 1. Always start with the ones first. 2. Add from the bigger number. 3. Carry the tens underneath the equals and in line with the tens column. 4. Remember to add it on at the end! **Task –** See sheets, challenge if you are feeling confident. **99 club practise!**	This week we have looked at 2 very famous astronauts Neil Armstrong and Yuri Gagarin. See you can tell an adult what they were famous for. Recap each astronaut using the PPTs (see website) **Task –** Write a report about Neil Armstrong or Yuri Gagarin. (see sheet template)	Rocket art using hands or feet! Using your hand or foot make a rocket picture or painting like the designs below.
